Requirements List

Requirement #	Requirement Name	Requirement Description	Requirement Risk	Requirement Type
REQ 1	Month Selection	Opens up a drop box where users have the opportunity to select the month in which they want to see the specific sneaker releases and once they click the month of their choice they will be prompted to that specific month and all the releases that are projected.	Medium	Functional
REQ 2	Store Selection	A list of stores will be shown beside the sneaker that the consumer decides to purchase and this will allow the user to be prompted to the store to purchase their shoe.	High	Functional
REQ 3	Newsletter Subscription	Users can sign up with their email to receive personalized emails and advertisements from the website to enhance their shopping experience.	Low	Functional
REQ 4	Responsive UI/UX	Users will be able to access the application through their mobile devices, and the grid layout of the calendar will be responsive and user friendly across all platforms.	Medium	Non-Functional
REQ 5	Google Calendar Notification	When the user finds a pair of shoes that they're interested in they can click the plus icon which will automatically create an event in their Google calendar which will save the date and time of the release.	High	Functional
